Driving licence (B)

SKILLS

Identity & Access (IAM)
Access reviews, least privilege, segregation of duties, Active Directory/LDAP, IAM/PAM

Cybersecurity
Vulnerability management (CVSS, EPSS), EBIOS RM, ANSSI, OWASP (Mobile Top 10), ACLs, network segmentation, encryption (AES-256)

Systems & Networks
TCP/IP, VLAN, OSPF, DHCP, NAT, VPN, network administration

Cloud & Infrastructure
AWS, Azure, Terraform (IaC), Microsoft 365

Development
Python, SQL, Java, C, JavaScript, Swift, React, Git/GitHub, automated testing

Consulting & Project Management
Agile, Lean, Six Sigma, feasibility studies, strategic recommendations, public speaking

CERTIFICATIONS

CCNA 1 — Introduction to Networks

CCNA 2 — Switching, Routing & Wireless Essentials

CCNA 3 — Enterprise Networking, Security & Automation

AWS Cloud Practitioner Essentials

Google IT Support

Yellow Belt Six Sigma

LANGUAGES

French — Native

English — C1

INTERESTS

Chess

Sport (football, strength training, cycling)

Dylan Maxence GBENOU

Cybersecurity Engineer | IAM & Identity Security

Cybersecurity and network engineer who sees projects through from A to Z: understanding the need, building, delivering, convincing. At MTN and at Ecobank, I turned concrete problems (access, outages, monitoring) into delivered solutions.

Available from November 2026 · Paris region (Île-de-France) · Seeking a permanent position

EDUCATION

EIGSI La Rochelle — Master's-level Engineering Degree (Bac+5) · Major in Network Architecture and Information Systems · 2023–2026 · Degree awarded March 2027

Classes Préparatoires aux Grandes Écoles · two-year intensive programme in Maths/Physics preparing for French engineering schools · Cycle Père Aupiais, Cotonou, Benin · 2021–2023

Scientific Baccalaureate · Highest honours (Mention Très Bien) · Benin · 2021

Academic projects: EIGSI Business Game — 3rd in class · Product feasibility study pitched to lecturers and invited professionals.

PROFESSIONAL EXPERIENCE

MTN Côte d'Ivoire — Data Protection & IAM Intern

Abidjan, Côte d'Ivoire · August – November 2026

Context: *MTN Côte d'Ivoire (17M+ subscribers) must make sure each employee only has access to the tools they need. This check was done entirely by hand.*

- **Designed an access review automation application**, cutting the average review time from 2 h to 3 min, a 98% time saving that improved the team's operational efficiency;
- **Built automatic detection of risky accounts (unused accounts, former employees still active, dangerous combinations of rights)**, flagging more than 6,000 risky accounts in 1 month, ranked by criticality from 0 to 100 to prioritise remediation;
- **Extended coverage from 10 manual checks to 20 automated controls, aligned with the group security policy**, doubling the risks monitored;
- **Led the project end to end and reorganised priorities when an unexpected data quality issue arose**, delivering the tool on time, with PDF, Word and Excel reports.

Department: Enterprise Information Security & IT Governance · Supervisor: Patrice Tano, Senior Specialist Data Protection & IAM

Ecobank International — IT Intern (Systems & Networks)

Paris La Défense · February – August 2026

Context: *Network & Systems Engineering department of an international bank: systems available 24/7 and subject to European regulation.*

- **Contributed to a 15% reduction in outage resolution times** by handling day-to-day IT incidents on a critical banking infrastructure;
- **Wrote procedures and updated the outage documentation, help guide and incident knowledge base**, helping the team find solutions faster;
- **Analysed 3 months of incidents and proposed targeted fixes with the department's engineers**, eliminating 22% of recurring outages;
- **Studied and presented a centralised monitoring tool (Centreon) to management**, to detect problems before users are affected.

Department: Network & Systems Engineering · Manager: Patrick Pamen, Head of Network & Systems Engineering
Personal projects alongside: multi-cloud Terraform (AWS + Azure) · 3-tier network model (Packet Tracer)

Art Creativity — Assistant Consultant (Intern)

Calavi, Benin · July – August 2024

- **Took part in Java development tasks assigned by the team;**
- **Provided IT support and created visual materials (Photoshop).**

IT PROJECTS

Vulnerability prioritisation tool — personal project (2026)
Python program that ranks which flaws to fix first (CVSS severity, EPSS exploitation probability, asset criticality). Real CISA KEV data, dashboard, Excel and PDF remediation plan.

Reving — AI proof of concept (2025)
Converting 3D scans into CAD files through shape recognition (Python, Open3D, TensorFlow/PyTorch).

BudgetTracker — iOS + Web (2026)
Encrypted budget management (AES-256-GCM, biometrics, OWASP Mobile Top 10), 48 unit tests, web dashboard deployed in production.
